

Give Tanzanian kids a toothbrush to smile about!

Brush with **this** instead of this

Families around the Kilimanjaro cannot afford dentists and plastic toothbrushes.

Greenmanjaro's sustainable solution is a toothbrush tree! We teach children at school to clean their teeth with the twigs from this tree and plant and nurture toothbrush trees.

This tree is medicinal as well as nutritional! Due to deforestation, there is a toothbrush tree shortage in Tanzania.

Scan to plant a toothbrush tree for € 2,-
